German troops leave French
territory

1873

Emay Brull

Cal. Japans adopted Oregonian

1873

English mathematician William Shanks calculated the value of pi to 707 places. It took him 15 years to do so.

In 1949 the 1st electronic computer calculated it to 2,035⁻ places, in 3 days - and found that Shanks had made a mistake and the last 100 figures of his figures were wrong.
